INTRODUCTION

Trinity Industrial Services, LLC is a licensed Service Disabled Veteran Owned Small Business ("SDVOSB"). We provide federal, commercial, industrial and municipal demolition, facilities decommissioning, environmental remediation, and abatement services. Our highly skilled staff and specialized equipment deliver safe and cost-effective solutions for all types of demolition, environmental remediation and abatement. Trinity's management team has over 40 years of experience and the capabilities to safely and successfully demolish, remediate and recycle a wide range of structures. These include but are not limited to military barracks and large buildings, large shopping malls, office complexes, multi-building housing and mixed-use developments, industrial manufacturing facilities, power generation plants and subsurface piping and pump complexes. We pride ourselves in meeting all the needs of our clients with high quality workmanship and in a timely, flexible and professional manner. Our goal is to meet or exceed all scheduling and cost performance goals while insuring strict compliance with all applicable health and safety regulations as well as LEED goals.

GOVERNMENT CONTRACTING

Trinity is adept at executing government contracts and has a variety of affiliated companies and contracting vehicles available. Trinity is classified as a Service Disabled Veteran Owned Small Business (SDVOSB) in all categories and can perform with full federal, state and local compliance and reporting. Trinity is Proud to work with Snellings Walters for all of our Insurance needs.

Experience Modification Rating ~ .87

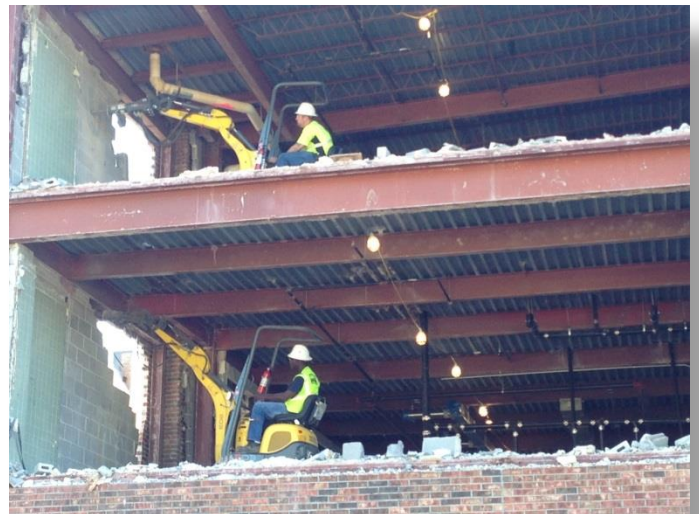

Gray Surety A.M. Best Rated A-VIII Full Bond Line.

TSS Trinity Specialty Services, LLC – Small Business ~ Explosive Demolition & Asbestos Abatement

Donlyn Environmental, Inc. – Small Business, Environmental Consulting Services.

SERVICES PROVIDED

Structural Demolition and Equipment Dismantling – *Trinity* provides a complete range of services from commercial demolition to complex structural demolition and the dismantling of industrial structures and equipment. We design and perform all our services to meet the time and cost needs of our clients while complying within all OSHA Health and Safety Regulations. Similarly, we pride ourselves in taking advantage of all opportunities in material recycling while maintaining minimal impacts to the job site, the environment, and ongoing operations surrounding the job-site area.

Portable Crushing and Material Recycling – *Trinity* operates track mounted portable crushing and screening equipment. We can design and document a LEED compliance project and can professionally perform recycling of concrete, aggregates, metals and other reusable building materials for reintroduction to the project site or for resale.

Environmental Remediation and Abatement – The environmental background of our experienced management team affords us the capability to perform the most complex environmental remediation projects as well as all aspects of large commercial and municipal abatement and demolition projects. Our goal is to provide the seamless coordination of abatement and demolition activities for all of our clients.

Hazardous Soils Remediation – *Trinity* has the experience and in-house ability to perform every type of hazardous soil remediation project from the small scale “treat on site” project to the large scale “treat and remove” project.

HEALTH AND SAFETY

At *Trinity Industrial Services*, we strongly believe that the safety of our staff, subcontractors, clients and site surroundings is our most important goal. We promote an accident-free workplace and “safety is no accident” philosophy through utilizing our extensive On-Site Health and Safety Plans and enforcing our comprehensive health and safety policies and practices. We hold all our staff accountable for this program and require participation at all levels. Our health and safety program is designed in accordance with the National Demolition Association and OSHA. Occupational health and safety for all on-site personnel and safety to the environment are always one of the most important aspects of the success of any project.
